

Muslim Hands AI-Powered HMS

Official Design Language v1.0

Core Brand Colors (extracted from logo)

Primary Muslim Hands Cyan:
#36B8D8

Deep Cyan:
#1E9FC0

Light Cyan:
#6ED4EC

Glow Cyan:
#73E8FF

Supporting Colors

Deep Navy Background:
#061425

Midnight Surface:
#0A1B31

Glass Surface:
rgba(255, 255, 255, 0.08)

Glass Border:
rgba(255, 255, 255, 0.15)

Status Colors

Success:
#22C55E

Warning:
#F59E0B

Critical:
#EF4444

Information:
#36B8D8

Visual Identity

When users open the HMS, they should instantly feel:

Muslim Hands + AI + Humanitarian Operations

not

Hospital Software

and not

Corporate ERP

The application should feel like a modern humanitarian command center.

Dashboard Theme

The second (dark) Invoker screenshot is the correct direction.

However:

Replace Purple

With Muslim Hands Cyan

Replace Pink Glow

With Cyan Glow

Replace Orange Neon

With Warm Humanitarian Amber

Replace Blue Neon

With Turquoise-Cyan

Background System

Instead of a flat dark background.

Create a 5-layer shader system.

Layer 1

Deep Navy
#061425

Layer 2

Slow-moving mesh gradient

Colors:
#36B8D8
#0A1B31
#1E9FC0

Movement:

Very subtle.

30–40 second cycle.

Layer 3

Blurred geometric Islamic patterns.

Opacity:
5%

Only visible when noticed.

Layer 4

Glass surfaces.

Layer 5

AI lighting effects.

Top Navigation Bar

Exactly same placement as Invoker.

Left

Muslim Hands logo

Animation:

Soft cyan breathing glow.

Every 5 seconds.

Center

Global Search

Placeholder:

Search patients, beneficiaries,
programs, cases, reports...

Glass input.

Right

Notifications

AI Assistant

Profile

Theme Switch

Welcome Panel

Same location.

Greeting

Assalamu Alaikum,
Dr. Tapash

Subtitle

Here is today's humanitarian
health operations overview.

KPI Cards

Same positions as Invoker.

But redesigned.

Patients Served

Icon:

Medical cross

Gradient:

#36B8D8 → #73E8FF

Glow:

Cyan

Active Cases

Gradient:

#F59E0B → #FFD166

Glow:

Amber

Beneficiaries

Gradient:

#36B8D8 → #22C55E

Glow:

Turquoise

AI Alerts

Gradient:

#36B8D8 → #EF4444

Glow:

Critical Alert

Glassmorphism Specification

This is where Flutter becomes powerful.

Every card should use:
BackdropFilter

Blur:

24 px

Transparency:

10%

Border:

1 px

Border Color:

rgba(115, 232, 255, 0.25)

Frosted Glass

Cards should contain:

Background Blur

-

Glass Tint

-

Reflection Layer

-

Edge Glow

-

Dynamic Light Layer

Result:

VisionOS-like appearance.

AI Orb (Bottom Center)

This becomes the signature feature.

Inspired by:

- AI
 - Humanitarian aid
 - Global impact
-

Visual Structure

Inner Core

Muslim Hands logo

Ring 1

Rotating cyan particles

Ring 2

Glass halo

Ring 3

AI energy field

Ring 4

Pulse wave

Flutter Shader:
FragmentProgram

Charts

Keep exact placement from Invoker.

Humanitarian Trends

Patients

Referrals

Medicine Distribution

Outreach

Animated chart drawing.

Curves animate on load.

Revenue Insight Card

Replace with:

Program Impact Index

Circular progress.

Example:
78%
Target Achievement

Breakdown:

- Health
 - Shelter
 - WASH
 - Education
-

Recent Activities

Same placement.

Examples:

- Patient Registered
 - Referral Approved
 - Medicine Dispensed
 - Outreach Completed
 - AI Alert Generated
 - Beneficiary Verified
-

Dynamic Shadows

Instead of ordinary shadows.

Each card has:

Contact Shadow

Small

Ambient Shadow

Large

Cyan Glow Shadow

Brand color

Example:

```
0 0 40 rgba(54,184,216,0.20)
```

Complex Animated Gradients

Most apps fail here.

For Muslim Hands HMS:

KPI Cards

Slow breathing gradient.

Dashboard

Aurora gradient.

AI Orb

Fluid plasma gradient.

Loading Screen

Animated mesh gradient.

Login Screen

Moving cyan light rays.

Motion System

Every animation:

60 FPS minimum

120 FPS target

Micro interactions:

150–250ms

Card hover:

200ms

Page transition:

350ms

Dashboard load:

Staggered animation.

Top to bottom.

Material 3 Usage

Use Material 3 only as the foundation:

- Navigation
- Accessibility
- Typography
- Responsiveness
- Theme architecture

Do **not** use default Material 3 visuals.

Create a custom design system on top of Material 3.

Final Design Goal

If someone compares the finished app with the Invoker dashboard:

- Same information density
- Same dashboard layout
- Same premium feel

But visually it should look like:

Muslim Hands Mission Control AI

with:

- Official Muslim Hands cyan branding
- Advanced glassmorphism
- Frosted glass layers
- Shader-driven gradients
- AI-powered interactions
- Flutter-native 60–120 FPS animations
- Enterprise-grade humanitarian operations aesthetics

The result should feel closer to a futuristic UN humanitarian command center than a traditional hospital management system.
